Retiring Faculty Recognition Luncheon

May 1, 2012

University Place Hotel
Ballroom
Indianapolis, Indiana
IUPUI aspires to be one of the nation’s great urban universities. We value the commitment of students to learning; of faculty to the highest standards of teaching, research, and engagement; and of staff to the highest level of service.

As members of the faculty—whether for many years or for a shorter time—you have dedicated your time and efforts to those high standards and thus advanced IUPUI’s mission. As you enter retirement, we pay tribute to your loyalty to your school and contributions to our shared vision for excellence.

Some of you will stay in our community. Others will join other communities. But you are forever part of IUPUI. You have helped to build a great university. And you have given to generations of students the best legacy of all—the ability and commitment to keep learning, which is the instrument of a meaningful life.

Together with all your IUPUI colleagues, I thank you for your service.

Charles R. Bantz
Chancellor of IUPUI
Today, we honor all retiring faculty members. This is an opportunity to convey our sincere thanks for your many years of dedicated service to IUPUI. Your contributions have shaped IUPUI into Indiana’s premier urban public research institution. In a short period of 40 years, IUPUI has become a leader on the national scene, with a very bright future.

We owe you a great deal for developing a set of ideals and expectations that will guide us for many years to come. Your efforts have led to the development of programs, departments, centers and schools from modest beginnings to flourishing scholarly units.

As you leave your formal duties, be assured that those who follow will do their best to realize all your hopes for what IUPUI can become. In your retirement years, we hope you will remain engaged and involved in more selective and limited ways, knowing that IUPUI will always be your academic home. Please follow our progress and support us in whatever way you can. Thank you again for your hard work. Best wishes for a happy retirement!

Uday Sukhatme
Dean of the Faculties, IUPUI
### 2012 Honorees

Dr. Drew Appleby came to IUPUI in 1999, following a long career as Chair of Psychology Department at Marion College. Dr. Appleby was recruited to IUPUI in the role of Director of Undergraduate Studies to bolster the undergraduate experience and heighten the sense of community within the department for our students. In 2010, he was named the Associate Dean for the Honor’s College at IUPUI.

Dr. Appleby has been committed to the teaching of psychology both for our students at IUPUI and within our professional. He has been chair of several committees for the American Psychological Association’s (APA) Society for the Teaching of Psychology. He also participated in an APA Task Force that developed competencies for undergraduate psychology majors. These efforts have been recognized by APA and he is a Fellow in two divisions of the Association (General Psychology and the Society for the Teaching of Psychology).

A review of the significant list of published and presented work clearly shows Dr. Appleby’s interest in student development and well-being. Students have responded to his genuine interest in them and fondly refer to him as Dr. “A”. He is regularly identified by many, many students as a professor who changed the course of their life and has also been chosen for numerous awards from students groups in the department and on campus.

Drew clearly met the goals he was hired to achieve. Our undergraduate students are better prepared for graduation and life after college. They better understand how their psychology major can help them to achieve their goals and they are more connected
to the department through the various activities and ‘meals’
developed by Dr. Appleby. This impact on the students and
department will be lasting.

Jane Williams, PhD
Associate Professor and Acting Chair
Department of Psychology
Purdue School of Science, IUPUI
Janis Beckstrand, PhD, RN, FAAN
Associate Professor
Department of Environments for Health
School of Nursing

Dr. Janis Beckstand’s contributions to Indiana University School of Nursing through the Department of Environments for Health cannot be measured in the few paragraphs allotted for this tribute. Jan came to Indiana University School of Nursing from Texas to enhance doctoral education for nurses, and she has given selflessly to educate the next generation of nurse researchers.

Dr. Beckstrand has an expertise in statistics and this has been a tremendous asset to the IUSON faculty and students alike. She has mentored 11 doctoral students and been a master’s thesis advisor for two students. Her fields of specialization and funded research include: research methodology, statistics, measurement, clinical research development, philosophy of science, neurological nursing, emotion in caregiving/Alzheimer’s caregiving, community health nursing, and epidemiological methods. She has also worked collaboratively with many colleagues on research grants over the course of her career.

Throughout her tenure Dr. Beckstrand has taught many courses for the IUSON that align with her expertise. She has taught numerous doctoral level statistic courses, master’s level statistics in nursing, undergraduate statistics, graduate and undergraduate nursing research, graduate and undergraduate nursing theory, graduate and undergraduate community health nursing and undergraduate communications. With this broad knowledge and expertise Dr. Beckstrand can potentially contribute to the IUSON through teaching for many years to come.

Dr. Beckstrand has also been a leader in service to the school, university and community. Most recently she served as chair of the IUSON Faculty Affairs Committee where she oversaw
the development of a new faculty workload document. In this role, Dr. Beckstrand demonstrated strength in her ability to represent faculty and communicate effectively with nursing administration to ensure all perspectives were incorporated into the final document. As an active member of the IUPUI Faculty Affairs Committee she worked with colleagues across the campus to develop a policy which provides a structure for non-tenured faculty to participate in the faculty governance process. Her commitment to the academy and advocacy for her faculty colleagues will leave a void with the School of Nursing and Indiana University.

Anne Belcher, PhD, RN, PNP
Associate Professor and Department Chair
Environments for Health
School of Nursing
Dr. Wolfgang Bielefeld is an outstanding colleague who has made significant contributions to the field of nonprofit management and philanthropic studies. Prior to his appointment in 1999, Professor Bielefeld taught at University of Texas, Dallas and received his doctorate in sociology from the University of Minnesota. Over the twelve years at IUPUI, Wolfgang has helped to shape the nonprofit program at SPEA as well the Center on Philanthropy. Most recently, he has led the international efforts at the Center on Philanthropy, as Director of International Programs.

I was chair of the search and screen committee when we recruited Wolfgang. Given his reputation in the field, we were delighted when he accepted the position at SPEA. During his tenure, Wolf has published in the areas of social entrepreneurship, charitable choice, and nonprofit networks and the nonprofit environment—including many publications as well as books. Most notably, his books on The Management of Nonprofit Organizations and Social Enterprises due to be published in 2012, Charitable Choice at Work: Evaluating Faith-Based Job Programs in the States published in 2006, and Nonprofit Organizations in an Age of Uncertainty: A Study of Growth and Decline published in 1998 have made a tremendous impact on the field of nonprofit studies. He received several prestigious awards as a result of his scholarship, including winner of the 2001 Association for Research on Nonprofit Organizations and Voluntary Action Award for Outstanding Book in Nonprofit and Voluntary Action Research; winner of the 1999 Academy of Management, Public and Nonprofit Division; Book of the Year Award of the 1999 INDEPENDENT SECTOR Virginia Hodgkinson Research Award.

Under Wolf’s leadership, the Center on Philanthropy has engaged universities from around the globe in advancing the field of philanthropy internationally. As Director of International
Programs, he has travelled extensively as a representative from SPEA and the COP to develop research collaborations and teaching opportunities in countries such as Egypt, China, Australia, Turkey, and Singapore. His work, particularly in China, has enabled us to recruit international students, develop research programs, and most importantly, create new centers and programs at Sun Yat-sen University (SYSU) and Peking University. I had the opportunity to travel with Wolfgang to Sun Yat-sen University in Guangzhou Province, where Wolfgang had worked with academics there to develop a new Center on Philanthropy. As a result of his efforts, researchers at our Center on Philanthropy are now engaged in three different research collaborations—examining giving and volunteering nationally in China. This has been a tremendous opportunity not only in terms of our research and academic program potential, but the opportunity to change civil society in China by being at the ground level in the development of the nonprofit sector in this country.

On a personal note, I will sorely miss Wolf as a colleague. He is an exceptional scholar, a great colleague, and a special friend who has made his “mark” at SPEA, the COP, IUPUI, and me, personally. I know he will enjoy his retirement in his cabin in northern Minnesota—fishing, renovating his cabin, enjoying spending more time with his delightful wife Pat, and HOPEFULLY relaxing and enjoying life.

Debra Mesch
Professor, Public and Nonprofit Management
School of Public & Environmental Affairs
Director of the Women’s Philanthropy Institute
Professor of Philanthropic Studies
Center on Philanthropy at Indiana University
Dr. Margaret (“Maggie”) Blythe is the quintessential adolescent medicine academic physician. She is a superb clinician, a tireless advocate for adolescents and their health and a committed teacher to students, residents, fellows, and colleagues. She has inspired us all here in Indiana.

Dr. Blythe has been the Medical Director for adolescent clinic services for Wishard Hospital since 1992. She has developed a model of excellence that provides multidisciplinary comprehensive medical services within a primary care setting for those adolescents with the greatest needs. She has taken this clinic model and extended it into the communities of school health and juvenile justice and related foster care systems to ensure the health and well-being of some of the most disenfranchised adolescent populations. She has persistently worked for adolescent health services that are accessible, equitable, and go beyond the minimal standard of care to ensure that all adolescents have a healthier life and an improved future.

Dr. Blythe’s passion voice for adolescent health has been heard at national level as well. She has been an invited speaker at many national professional meeting and flagship conferences; served on many advisory boards and committees, including serving as the recent Chair of the Committee on Adolescence for the American Academy of Pediatrics; has testified before the US Congress as well as the Indiana legislature on behalf of the health needs of adolescents. Her advocacy has also been extended through her teaching, wise leadership, requested input, and writing of many publications including the CDC’s Sexually Transmitted Disease treatment guidelines, the AAP’s Redbook, AAP’s position statements as well numerous book chapters, review articles and peer-reviewed articles.
Maggie Blythe has been a gift to Indiana’s adolescents and a treasure to her colleagues. We are grateful for her selfless dedication to caring for adolescents in our community, her training and mentoring of new generations of adolescent health care practitioners. Now, we can only thank her, and wish her well in this transition as she works “part-time!”

Vaughn Rickert, PsyD
Professor of Pediatrics
Director, Adolescent Medicine
School of Medicine
Dr. H. Glenn Bohlen joined the IU School of Medicine faculty in 1976 and began what was to be a very distinguished career as researcher, instructor, mentor and colleague.

Glenn has been recognized as an outstanding scientist throughout his career, beginning with induction as a Fellow of the Circulation Group of the American Physiological Society in 1978, and winning the Lamport Award for Outstanding Young Cardiovascular Scientist from the same group in 1979. Dr. Bohlen's prolific research led to him receiving the highest award of the Microcirculatory Society, the Eugene Landis Award for Microvascular Research, in 1997. In recognition of his work and leadership in microvascular physiology, Dr. Bohlen was elected President of the Microcirculatory Society in 2004. During his career Glenn successfully maintained two NIH grants for a combined total of 57 years and had numerous other grants including an NIH career development award.

Dr. Bohlen was consistently considered by students to be among the best instructors in medical and graduate physiology courses; he won the Indiana University Medical School Trustee Teaching Award in 2006 and 2009. Glenn served as primary mentor for 11 pre-doctoral students and 7 post-doctoral fellows. His students remember him as an advisor who dedicated significant time and energy to their training and preparation. Glenn was always concerned about his student's personal and professional success.

Throughout his career, Glenn would put others before himself, was eager to provide assistance and collaboration and was frequently sought out as a counselor by both students and colleagues.
Though officially retired, Glenn plans continue his outstanding career by serving as course director for Medical Physiology and assisting colleagues who need his expertise on research studies.

Joseph Unthank, MD
Professor, Departments of Surgery, and Cellular and Integrative Physiology
School of Medicine

Julia Lash
Director, Counseling and Psychological Services
Division of Student Life
IUPUI
**Donna Boland, PhD, RN, ANEF**  
Associate Professor Emerita  
Department of Adult Health  
School of Nursing

On this occasion of your retirement, after almost twenty-two years of distinguished service to Indiana University School of Nursing, it is my distinct pleasure to recognize your many professional contributions to our school and to nursing education. You are an established national leader in program assessment and evaluation, and curriculum development, and your leadership has also greatly influenced the development of accreditation standards in the nursing profession.

Your contributions to nursing education include being one of the founding Commissioners for the Commission on Continuing Education (CCNE) and serving on CCNE’s first appointed Accreditation Standards Review Committee. These contributions helped reshape the standards for nursing accreditation in our country. You also provided leadership on the National League for Nursing’s Executive Committee for Baccalaureate and Higher Degree Programs, developing the mission and goals for a newly restructured NLN. You have over two decades of experience as an accreditation evaluator in both the CCNE and NLNAC, influencing the program development of many nursing schools. In recognition of these significant and influential national contributions to nursing education, you were inducted as a fellow in the National League for Nursing’s Academy for Nursing Education.

Your leadership within the state of Indiana is as equally impressive, resulting in a stronger statewide nursing education workforce. You served as President of the Indiana Deans and Directors, led the IONE sub-committee which established statewide competencies of associate, baccalaureate and advanced practice graduates, and most recently have served as the President of the Indiana Nursing Workforce Development Coalition. You continue to provide leadership within the state in your current role as interim President of the Indiana Center for Nursing.
The School of Nursing has benefited immensely from your fifteen years of leadership as Associate Dean of the undergraduate nursing programs and almost seven years in the position of Associate Dean for Evaluation. I have always valued your thoughtful, scholarly approach to academic issues and your daily presence within the school will be missed by many. And I would be remiss if I did not mention that one of my fondest memories of our many collaborative ventures was our drive down a sidewalk in Bloomington to secure a parking place so that we would not be late for our meeting with Bloomington nursing students! With gratitude for many years of colleagueship and sincere respect for your many contributions to nursing education, I wish you the very best as you begin your retirement years.

Judith Halsted, PhD, RN, ANEF, FAAN
Executive Associate Dean
Academic Affairs
School of Nursing
Robert Bringle, PhD  
Chancellor’s Professor of Psychology and Philanthropic Studies  
Purdue School of Science, IUPUI  
School of Liberal Arts

Bob Bringle has achieved the enviable status of an internationally recognized scholar. He combines his research and experience in psychology, for which he has attained wide recognition, with path breaking work in research related to service learning and community engagement. He has achieved a singular distinction because he has applied his knowledge through administrative leadership as the founding director of the Center for Service and Learning—the focal point of IUPUI’s reputation as a leading engaged university.

His accomplishments have been recognized locally with the rank of Chancellor’s Professor at Indiana University and such accolades as the Pinnell Award for service; nationally with the Thomas Ehrlich Award for Service Learning; and internationally with an honorary doctorate awarded by the University of the Free State in South Africa. There are numerous other external validations of his distinguished status at all levels of attainment in teaching, research, and service. At his retirement, Bob leaves not a void to be filled but a model to be emulated. His legacy will endure through the leadership team he has recruited and the principles of civic mindedness he has inculcated in the character of IUPUI.

Bob Bringle arrived at IUPUI in 1974 with a PhD in psychology from the University of Massachusetts at Amherst. IUPUI was not yet five years old, and this Hoosier from Richmond, who had attended Hanover College as an undergraduate, thought he was just passing through, like so many others who came to IUPUI at its beginning. But something made him see IUPUI for the unique opportunity that it became. He helped build the campus as he developed his own unique blend of scholarship, engagement, administration, and teaching. Others in his discipline could speak more knowingly of his work as a psychologist, but I would like to celebrate what he has achieved in the area of community.
engagement and service learning—involving both intellectual and administrative work.

As Executive Vice Chancellor and Dean of the Faculties, I worked with Bringle for nearly seventeen years (and I have watched closely in the intervening years) as he helped shape a new field of inquiry and practice, applying his scholarly training as a psychologist to developing a deeper understanding of the value and practice of service learning. He is, without question, one of the five or six people in the United States who have developed this now-proven pedagogy into the global phenomenon that it has become. When anyone seeks evidence for the value of service learning, they turn first to Bob Bringle. Few scholars ever see the kind of impact that Bringle has had on whole institutions, let alone a pedagogical movement.

His contributions, ranging from the “engaged department” initiative to a student scholarship program that was one of the first in the nation to recognize service as merit to a nationally-exemplary model of partnership with the near-by Washington Community School, have made IUPUI one of the most widely recognized engaged universities in the country, attracting such prestigious designation’s as the President’s Award for Community Engaged, first awarded by President Bush, or USNWR’s designation of IUPUI as one of the country’s most “up and coming” universities. Bob help create a sense of community within IUPUI—involving staff and students as well as faculty—as a value of inclusion that made connections with the larger community so vital and strong.

Bob Bringle has made IUPUI a much better place for his presence, and he has--by himself--enhanced the reputation of IUPUI to a
significant degree. IUPUI celebrates Bob Bringle and thanks him for his commitment throughout a professional career well-lived. IUPUI will remain engaged, Bob.

William Plater, PhD
Executive Vice Chancellor Emeritus on behalf of the IUPUI community
Nancy Van Note Chism’s career in higher education spans 26 years, 14 of which were spent at The Ohio State University and 12 at IUPUI. She began as a teaching consultant at Ohio State, in time becoming the Director of the university-wide teaching center and faculty member in the Higher Education program, where she taught College Teaching and Qualitative Research Methods. She became President of the national professional association in this field, the Professional and Organizational Development Network in Higher Education, and received the highest service award of that association.

From 1999 to 2006, Nancy was Associate Vice Chancellor for Academic Affairs and Associate Dean of the Faculties at Indiana University Purdue University Indianapolis (IUPUI). She served on numerous committees addressing key campus issues, including retention, learning spaces, technology, and diversity.

Upon her change to a full-time faculty position, she became active in international educational development, including projects with the Commission on Higher Education in Thailand, Moi University in Kenya, and Singapore Management University. She served as a Fulbright Scholar in Thailand in 2008. Nancy has advised and positively impacted many, many doctoral students in higher education and taught courses in professional and organizational development, the professoriate, college teaching and learning, global education, and qualitative research methods. Her service to the university since 2006 has included a term as Co-Chair of the faculty in Education, as well as serving on the promotion and tenure and International committees. She has provided extensive service and leadership in the Higher Education and Student Affairs program at both core campuses. She also co-chaired the FACET peer review committee. Nancy regularly contributed time as a panelist or guest speaker for various campus organizations. Nancy has consulted on professional development or college teaching and learning at more than 50 campuses in the United
States and internationally. She has authored or co-authored over 80 additional publications on professional and organizational development and college teaching and learning. She has won several awards for teaching, leadership, and support for graduate education from both Ohio State and Indiana Universities and has won national awards for service and research.

In sum, Nancy has done it all with the highest quality and utmost professionalism. Her colleagues marvel at how she makes it look so easy, but we know she has worked incredibly hard on behalf of her students, our school, the university, and entities throughout the world. We are forever grateful for her amazing contributions and we wish her all the best in the next phase of her life.

Pat Rogan, PhD
Executive Associate Dean
School of Education
Jennifer Cochrane became an Associate Faculty member in the Department of Communication Studies in 1980 and has served with distinction and enthusiasm ever since. She became the Assistant Director of the public speaking course under Bruce Wagener in 1990 and Course Director when he retired in 1998, the year she also became a full-time Lecturer in Communication Studies. Bruce always said he was so glad to leave the course in “Jennifer’s capable hands.” She became our Director of Online Teaching and Learning in 2004 and was promoted to Senior Lecturer in 2006. The School of Liberal Arts recognized her expertise in online pedagogy; Jennifer serves as an Online Pedagogy Consultant to those in the School who want to develop online courses.

Jennifer has taught numerous courses including public speaking, voice and diction, and developed and teaches the core course, Human Communication and the Internet, for our online certificate. Jennifer championed the development of our online certificate, the first of its kind in the School. Her teaching has been recognized with several awards, including: the Most Valuable Associate Faculty award and the Teaching Excellence Recognition Award. Her workshops, panels, and invited addresses are too numerous to mention. She has organized and regularly participates in the Basic Course Directors’ Conference. Her pedagogical publications have been instrumental in developing the pedagogy of the basic course at IUPUI and around the country. Her leadership as a senior lecturer has been a valued contribution to this department.

These accomplishments reflect a colleague who has had a significant impact on the department, the school, and IUPUI. No doubt her contributions paved the way for future innovations in our basic course and online courses. Jennifer will continue to teach one online public speaking course each semester and hopefully have time to enjoy her beautiful apple orchards and the scenery of her
rural home with her husband. We thank her for her many years of dedication to our department, the basic public speaking course, and to communication pedagogy.

Kristina Horn Sheeler, PhD
Associate Professor and Chair
Department of Communication Studies
School of Liberal Arts
**Anna DePaoli-Roach, PhD**  
Professor Emeritus of Biochemistry and Molecular Biology  
School of Medicine

Anna DePaoli-Roach began her academic career at the Department of Biochemistry and Molecular Biology in IU School of Medicine in 1979. Over the past 33 years she has played a major role in the growth and success of our department and school.

In research, Anna took on what at the time was an especially challenging and difficult area, the study of protein phosphatases. She has been a pioneer in the application of molecular biology to probe the structure, function, and regulation of protein phosphatases and more recently, in the utilization of knockout and transgenic mice to investigate the role of protein phosphatases in diabetes and obesity. She was extremely successful and is considered to be one of the leaders in this area of research. Since the mid-1980s, very few Protein Phosphatase meetings world-wide did not have Anna as an invited speaker. She was funded in this work until 2007 as a PI and has published over 130 papers in premier scholarly journals, an exceptional record. Anna has served her discipline as a reviewer of grants, having been a regular member of an NIH Study Section, as a reviewer of manuscripts, including a 4 year term on the editorial board of the Journal of Biological Chemistry, and having contributed to the organization of the FASEB biannual Protein Phosphatase meetings, chairing the 2000 Meeting. Anna has brought prestige and international recognition to the School and the University throughout her outstanding research career.

Anna has always been the consummate Departmental citizen. She has participated relentlessly in departmental teaching, service and even social activities. Initially she was involved in medical student education, teaching both in B800, the main first year biochemistry course, and Problem Based learning. Later on she concentrated her efforts in graduate teaching. For many years, she participated in the G865 Molecular Biology Core and B810 courses of the Biochemistry PhD program until the recent reorganization of the whole graduate program at IUSM. In the 1980s, she was a founding initiator, with Dr. Chao Lee, of a hands-on practical Molecular Biology Methods course and went on to develop an advanced version of the course, of which she was the course
director. She has for many years been director of the Student Seminar Course, B890, a critical component of our Graduate Program. She is a long-time major contributor in the B500 basic biochemistry course, an important introductory course that draws many students from a variety of venues on campus. When the graduate program was reorganized, she stepped up to develop a new molecular biology course, G825, of which she is co-director. In addition to formal teaching, she has been on the Graduate committees of a large number of PhD students and has been extremely active in advising and helping them in their research. In service to the department, Anna currently is a member of the Departmental Promotions and Tenure Committee, obviously a very important responsibility. She has devoted herself for years to the departmental seminar program, ensuring that invited speakers were of high quality and matched the interests of the faculty. She has been member of a number of faculty search committees. She has been instrumental in organizing numerous departmental functions, including retreats, research day events and hosting of invited speakers, including three Beering Awardees and two Burroughs Wellcome Visiting Professorships in Advances in Science and Medicine.

Anna has served the School on several important Committees. These include the Faculty Steering Committee, the Biosafety committee of which she was vice-chair, the School Promotion and Tenure Committee, the Biomedical Research Committee and the IACUC. The last three of these are extremely important and demanding committees, entailing a significant commitment of effort and time. She has also participated in School Search committees, including the last two LARC director searches and the Physiology Chair.

Anna is internationally recognized as a researcher with an exceptional record of productivity and visibility in her field. As an educator, she has had a major impact in the Department. Her service to the School is likewise exemplary. She retires looking forward to staying active in research by contributing to the projects of her husband Peter Roach on the laforin phosphatase and Lafora disease, a deadly form of juvenile epilepsy. She is a trusted and loyal member of our department and the faculty of Biochemistry and Molecular Biology thank Anna for her many contributions to our department and the School of Medicine.
Zhong-Yin Zhang, PhD
Robert A. Harris Professor and Chairman
Department of Biochemistry and Molecular Biology
School of Medicine
Joseph DiMicco, PhD
Emeritus Professor of Pharmacology & of Neurobiology
School of Medicine

Dr. Joseph A. DiMicco earned his Ph.D. in Pharmacology at Georgetown University in 1978 and after a two year postdoctoral fellowship at the National Institute of Mental Health he accepted an appointment as an Assistant Professor in the Department of Pharmacology and Toxicology in the School of Medicine. Thus, began his long and highly productive academic career at IUSM which I am sad to say ended in December with Dr. DiMicco retiring from the university. After his arrival in Indianapolis in 1980, Dr. DiMicco was rapidly promoted up the ranks and became a full professor in Pharmacology and in Neuroscience in 1988. In 2006, Dr. DiMicco was named a Chancellor’s Professor of Pharmacology and Toxicology, a rank he held until his retirement. Throughout his tenure, Dr. DiMicco exemplified the characteristics of a true academic through exceptional commitment to all three missions of the university: research, teaching, and service. He was a role model for junior and senior faculty because of his actions, his integrity, and his devotion to the university community.

Dr. DiMicco is a highly respected scientist both nationally and internationally. He made seminal discoveries that have significantly impacted our knowledge of how the brain modulates the body during stress. He sustained his research productivity throughout his career with continuous funding through extramural support. His work appeared in highly respected journals, and this work had high impact in his field. In addition to his publications, Dr. DiMicco often was invited to speak on his work at national and international meetings, served on review panels for government agencies and for a number of scientific journals.

Dr. DiMicco was an outstanding educator with a long history of excellence in teaching. The scope of his teaching was wide, from didactic lectures to large groups of students to individual mentoring. His teaching included his 19-year service as assistant director and then director of the Medical Pharmacology Course for medical students. Medical students continually ranked this as one
of their best courses. His efforts were recognized by the university and students alike since he was a recipient of the IUPUI Teaching Excellence Recognition Award in 1998, was a six-time recipient of Trustees Teaching Award, and was named Best Professor for the Spring Semester of 2008 by the IUSM Class of 2010. Dr. DiMicco also contributed to the teaching mission of the school in a number of other ways. He was involved with curriculum development and he served on the Medical School Curriculum Council, on the evidence-based medicine task force and as the basic science chair of the Medical Student Mentoring Program, Basic. He also organized the departmental Summer Undergraduate Research Fellowship (SURF) Program, one of first such programs nationwide and directed this program for 15 years. He mentored more than twenty undergraduate summer interns over the years, many of these students coming from IUPUI and going on to careers in science and medicine. He also supervised and mentored 12 doctorate students, many of them going on to highly productive careers in academics or in industry.

Dr. DiMicco was of invaluable service to the medical school, the university, and to the community. He served on a number of committees that contribute to the missions of the university including the Medical School Curriculum Council, on the evidence-based medicine task force, both IUPUI and IU faculty council, the University Affirmative Action Committee, the School of Medicine Admissions Committee and the Promotion and Tenure Committee. Nationally he served as regular member of a study section for National Institute for Drug Abuse (NIDA) and as an ad hoc member on numerous other NIH panels and study sections. He also was a member of the scientific review committee for NASA Life Sciences Program and was responsible for selection of projects and overall design of the Neurolab Shuttle Mission (STS 90) launched in 1998.

I have been a co-worker and colleague of Dr. DiMicco for 24 years and I respect him as a kind and honest man with high standards. Over a long and distinguished career Dr. DiMicco exemplified a high academic standard. He did not seek accolades, but always gave his best efforts for the students, for his peers, and for the
university. In a time when the pressures of research are strong, he maintained his commitment to excellence in learning and did much to provide students with a first rate education. He was always willing to mentor and advise co-workers. I wish him well in all his future endeavors and hope that he knows how much he will be missed.

Michael Vasko, PhD
Paul Stark Professor and Chair
Department of Pharmacology and Toxicology
School of Medicine
**Donna Dunn, MS, RT(T)**
Assistant Professor and Director of the Radiation Therapy Program
IU School of Medicine

It is an honor and a privilege to pay special tribute to Ms. Donna Dunn, a legendary radiation therapist educator, who has been at IUPUI for almost 43 years and will be retiring May 31, 2012. Donna’s career started at IUPUI in 1969 as a graduate of the Associate of Science Degree Program, in Radiological Sciences with a concentration in radiation therapy. At this time she became certified in radiation therapy and began her extensive career in, love for, and dedication to the radiation therapy profession. She completed a Bachelor of Science Degree in Radiologic Sciences, Allied Health Education in 1973, and her Master of Science Degree in Allied Health Education in 1979. She worked as a staff radiation therapist and clinical instructor for 6 years, in the IU Department of Radiation Oncology before becoming an instructor and director of the IU Radiation Therapy Certificate Program in 1976: the same program she had graduated from and taught in. Ms. Dunn has worked tirelessly for the radiation therapy program and has worked her way up to her present academic rank of Assistant Professor.

Her love of teaching and dedication to the radiation therapy profession is exemplified in the numerous authored professional articles, as well as through the significant amount of contributions she has made as a chairman or member on a variety of educational, professional, & community committees and task forces at the local, state, and most notably at the national level. Her professional colleagues often refer to her as the "Energizer Bunny, for her endless energy". She was a significant contributor to laying the professional and educational ground work for the radiation therapist profession, and for the IU Radiation Therapy program in which she was instrumental in elevating from a certificate to a baccalaureate degree program in 1990-- one of only 5 such programs, nationally at the time. She received the prestigious Varian Award for Achievement in Radiation Therapy Technology in 1993, an award given in recognition of her many contributions to the profession and her exemplary leadership as a radiation
therapist. Her outstanding teaching has long been recognized and in 1999, she received the IUPUI TERA teaching award.

Her dynamic and enthusiastic personality, love of the profession, devotion to students, and insurmountable energy will be truly missed. In her spare time, Ms. Dunn is an IU sports enthusiast - she especially loves IU football & basketball. Additionally she is an avid golfer, a movie buff, and a loving mother of 3 and grandmother of 6. She will now have more time to devote her abundance of energy and love of life to her family, the recreational activities she so enjoys, and to community volunteering.

Peter Johnstone, MD, FACR

Judith Schneider, MS, RT(R)(T)
Assistant Clinical Professor/Clinical Coordinator
Radiation Therapy Program
School of Medicine
Health Professions Programs
**Russell Eberhart, PhD**  
Professor of Electrical and Computer Engineering  
Purdue School of Engineering and Technology, IUPUI

Russ Eberhart received his Ph.D. in Electrical Engineering from Kansas State University (KSU) in 1972. He joined The Johns Hopkins University Applied Physics Laboratory (APL) where he served for 19 years. At APL he served as a project engineer and section supervisor in the Space Department and the Research Center. He was selected as a member of APL’s Principal Professional Staff. His projects included the Ingestible Temperature Monitoring System (ITMS), used to telemeter human core temperature to an external receiver. The ITMS has been used in applications for the Department of Defense and by astronauts on NASA’s Space Shuttle. In 1987, he was selected as Man of the Year by the KSU College of Engineering.

Prior to coming to IUPUI, he served as the Director of the Biomedical Engineering Center at Research Triangle Institute (RTI) in North Carolina. While there, his achievements included supervising the development of an ingestible drug delivery capsule that releases medication with a radio frequency command, and the development of one of the first virtual reality laboratories in the United States. While at RTI, he began working with Dr. Jim Kennedy on a computational tool called Particle Swarm Optimization.

Russ came to the Purdue School of Engineering and Technology at IUPUI in 1994. He has served as Chair of Electrical and Computer Engineering (ECE), Associate Dean for Research, Adjunct Professor of Biomedical Engineering, and Professor of ECE. He played a key role in bringing the ECE Ph.D. program to IUPUI. He has co-authored four books, is the co-inventor on four issued patents, and has one patent pending. The book Swarm Intelligence, co-authored with Jim Kennedy, is in its seventh printing. His most recent book, Computational Intelligence: Concepts to Implementations, has been adopted by dozens of universities worldwide for use as a graduate textbook. Russ and Jim Kennedy co-authored a paper on particle swarm optimization.
in 1995 which has been widely cited by more than 13000 literatures. He is widely regarded as a co-inventor and co-developer of the basic particle swarm optimization algorithm which has been applied to many application areas.

He has been elected as a Fellow of the Institute of Electrical and Electronics Engineers (IEEE), and Fellow of the American Institute of Medical and Biological Engineers. He and Jim Kennedy are the 2012 recipients of the highest award of the IEEE Computational Intelligence Society, the IEEE Pioneer Award, for their development and applications of Particle Swarm Optimization.

He currently serves as Chief Technology Officer for Phoenix Data Corporation in Indianapolis.

Yaobin Chen, PhD
Professor of Electrical & Computer Engineering
Department Chair, Electrical & Computer Engineering
Purdue School of Engineering & Technology, IUPUI
Garland Elmore, PhD
Associate Vice President of Information Technology
Associate Professor
School of Informatics

Dr. Garland Elmore joined the IUPUI faculty in 1976. He has served the university both as a faculty member and an administrator. He made seminal contributions to information technology in teaching and learning and to the broader work of the university in service and research.

When Dr. Elmore joined the university in 1976 he was charged with creating an academic program in communication technology. He established the curriculum, recruited outstanding faculty and staff, and served as director of the program.

In 1989 just as the digital revolution was coming into full force, Dr. Elmore moved into administration to lead the development of an IT strategy for IUPUI.

Under his leadership a number of campus units were consolidated to create Integrated Technologies, a visionary move for its time. In the early 1990s Dr. Elmore saw the future convergence of voice, data and video technologies and positioned his organization for that future.

Dr. Elmore served in the roles of associate dean of the faculties and associate vice chancellor under Chancellor Gerald Bepko. In 1997, he became University Associate Vice President for Teaching and Learning Information Technologies under then Vice President for Information Technology Michael McRobbie. In that role, Dr. Elmore harnessed his knowledge, expertise and experience to help build a world-class infrastructure of IT services and resources for the university. He made significant contributions to the first Indiana University Strategic Plan for Information Technology (1998) and led the formulation of the university’s subsequent strategic plan for Information Technology called Empowering People (2009.)
Dr. Elmore led the implementation of key initiatives in the strategic plans including the implementation of standard fixed technology in classrooms, life cycle funding for computers, and outstanding IT support and services on all campuses of Indiana University. He is a leading expert in the use of information technology in teaching and learning.

Dr. Elmore is a great leader and role model for many aspiring leaders. He is a good listener who always solicits input from students, faculty and staff. Over the years, he had grown to appreciate more and more the privilege to interact and work with students, whose welfare he always kept at the top of his priorities.

Colleagues and Friends in the Office of the VP for Information Technology and CIO
Dr. Gilkey is a 1972 graduate of the Indiana University School of Medicine, but her career at IU began in 1966 as a research assistant at the Institute for Psychiatric Research. She worked with children ages 3-5 years old that had been diagnosed with autism or early childhood schizophrenia. Over the past 40 years, she has been devoted to the students of the schools of medicine and nursing, police and firefighters injured while on duty, and the patients of Wishard Health Services.

She began the practice of medicine in the Department of Medicine, Division of General Internal Medicine, at the Marion County General Hospital (currently Wishard) and at the public health clinics throughout Indianapolis. From 1981 to 1994, as the director of Occupational Health for the Department of Public Safety, she cared for acutely injured police officers and firefighters often responding on site in the emergency department at Wishard. This role evolved to include preventive health care—nutrition modification, exercise, and stress management.

From 1982 to 1998, Dr. Gilkey became progressively involved with the Introduction to Clinical Medicine course taught to medical students. Under her direction the course grew, and so did she. “Teaching first and second year medical students has been one of the most richly satisfying experiences of my life.”

In 1996, Dr. Gilkey expanded her scope of patient care to include working weekly shifts in the emergency department. In 2000, when the paradigm changed to care delivered by emergency medicine trained and boarded physicians, Dr. Gilkey was invited to move full time to the newly created Department of Emergency
Medicine. She aided in the transition of a new faculty, many of whom had never practiced at Wishard, and she eventually built a new program to fill a need experienced by this patient population. The Emergency Physician Immersion Clinic (EPIC) provided follow up care to patients who did not have a primary care provider or who needed more immediate intervention. In this role, she cared for patients with limited resources and navigated the vast network of specialty providers and services.

“As I look carefully at my life in the practice of medicine…some patterns appear. Within the Indiana University School of Medicine and Wishard Hospital in particular, I have tried to discern where the confluence of need and my aptitude arises. Much of what I have learned over the years has come directly from patients, students, house staff, nurses, and colleagues. The learning process seems to improve for me as I grow older and listen better.”

She has received several awards and honors throughout her career, to include twice receiving the Gender Equity Award, Indiana University School of Medicine, American Women’s Association; and a 1988 Special Resolution passed in the City-County Council of Indianapolis on behalf of the injured police officers and firefighters.

Words cannot express our gratitude to Dr. Katherine Mitchell Gilkey and her service to us all.

Lisa Braun
Administrative Officer, Department of Emergency Medicine School of Medicine
Practice Administrator, IU Health Physicians - Emergency Medicine
Clifford Goodwin, EdD  
Associate Professor of Organizational Leadership and Supervision  
Department of Computer, Information, and Leadership Technology  
Purdue School of Engineering and Technology, IUPUI

Since joining IUPUI in 1979 as a faculty member in Organizational Leadership and Supervision in the Purdue School of Engineering and Technology, Dr. Cliff Goodwin has contributed to the growth and vitality of his department, school, campus, profession, and community.

As a department chair for 13 years, Cliff made consistent, strategic, and timely contributions to several undergraduate programs, E&T, and the IUPUI campus in the areas of (1) new program development; (2) student and faculty mentoring; (3) committee leadership and guidance; and (4) creating a sustainable leadership degree program that favorably compares to any other baccalaureate leadership degree in the country.

In service to E&T, Cliff has provided leadership to several important committees, initiatives, and strategic planning efforts. He is a role model to others, and has been instrumental in advocating for student success, faculty development, and the needs of local employers.

At the campus level, Cliff was elected multiple times as an at-large member to IUPUI Faculty Council, including serving two terms on the Executive Committee; has served as chair of the Faculty Council for the General Studies Degree Program for six years; and was a Founding Faculty Member of University College.

To his profession, Cliff has been instrumental in making significant contributions, most notably as the author of several best-selling textbooks in supervision, leadership, and conflict resolution. He also has served as College Relations Director for the Indiana Society for Human Resource Management.
Finally, Cliff’s contributions to the Greater Indianapolis community have made a lasting impact. He received the 1,000 hour service award for his efforts as a volunteer for Crisis and Suicide Intervention Service of Marion County; has served on the Board of Directors for the Crisis Resource Federation of Indiana; and was the United Way campaign coordinator for many years.

Stephen Hundley, PhD
Associate Dean for Academic Affairs and Undergraduate Programs
Associate Professor of Organizational Leadership and Supervision

Robert Wolter
Senior Lecturer of Organizational Leadership and Supervision

Elizabeth Wager
Adult and Prior Learning Advisor, Organizational Leadership and Supervision
Robyn Goshorn, MD, FACP
Associate Professor of Clinical Medicine
School of Medicine

Dr. Goshorn has recently retired from a distinguished, thirty-year career in academic and clinical internal medicine. He graduated from the College of Physicians and Surgeons of Columbia University in 1974, and completed his internal medicine residency at Indiana University Hospitals in 1977. He was chief resident at Wishard Hospital from 1977 to 1978. He has been a member of the faculty since that time. After being in private practice for a number of years, he returned to the university full time in the late 1980’s in order to establish a general internal medicine service at IU Hospital. This provided inpatient, consulting, and ambulatory internal medicine care for patients at the hospital and was an important teaching service for medical students and residents.

In addition to his clinical responsibilities, Dr. Goshorn was very active in the medical school and spent a lot of effort developing new competency-based curricula for the medical school. He taught physical diagnosis classes to the second year medical students and supervised residents, interns, and medical students on the general medicine ward teaching service.

He has a special interest in chronic fatigue syndrome and has published articles and has spoken on the topic many times. He was an integral member and volunteer of the St. Thomas Clinic in Whiteland, Indiana. This clinic provides office-based medical care free of charge to persons who are unable to obtain medical care for financial reasons.

On behalf of the School of Medicine, I would like to thank Dr. Goshorn for his dedication and commitment to teaching and patient care throughout his career. He has a well-deserved reputation of being a preeminent diagnostician and clinician. He is
certainly one of the finest physicians I have ever known. I bid farewell to my personal mentor, colleague, and friend.

Rachael Bowles, MD, FACP
Associate Professor of Clinical Medicine
School of Medicine
Joseph Harmon, MA
Reference Team Leader
Social Work Librarian
University Library

Joseph C. Harmon joined University Library in 1989 as a monographic cataloger. He served as the Cataloging Team Leader for University Library from 1996-2002 and as the library’s team leader from 2003 until his retirement in 2011. He also served as liaison librarian to the departments of Religious Studies and Philosophy within the School of Liberal Arts and later as librarian liaison to the School of Social Work.

While at IUPUI, Mr. Harmon earned a Master of Arts degree in anthropology. This attainment is indicative of his great love of learning, a trait which served him well as he led library teams during periods of great technological change. Mr. Harmon was instrumental in navigating the library’s transition to an online catalog and, later, managing the Government Documents Collection as the federal government made a major transition from print to digital publications.

We wish Joe well as he enjoys his next great adventures.

Bill Orme, PhD
Associate Dean
University Library
Dr. John T Hazer came to IUPUI in 1975, a recent graduate of Bowling Green University. John has been instrumental in developing the Industrial/Organizational (IO) Master’s program and the Department of Psychology into the vital programs they are today. His stamp is ever present in all the important systems in the Department. John served as Department Chair from 1983-1991, which was a time of great growth in graduate education and when the department transitioned from 38th street to its current location. Several of his initiatives to strengthen the department are still in place today.

John has been the head of the IO Master’s program since 1986. Under his leadership the program developed into one of, if not, the top Master’s program in the country. Through his hard work, the program has developed strong relationships with employers throughout Central Indiana which have provided students with ‘real world” experiences. He has chaired over 40 Master’s theses and been a member of over 50 other committees. Many of these students have gone on to complete PhD’s at other top institutions while others have gone on to highly successful applied careers.

Across his career, John has provided professional service to many local organizations including IUPUI. In past years, he consulted and provided professional service to several departments within the City of Indianapolis including the Department of Public Safety.

John has always stated very clearly that he wants our students to not only be strong applied psychologists, but also good people. This goal, although lofty, speaks volumes about John as a person. John values and expects others to make the appropriate choices in terms of their behavior, but more importantly he holds himself to similarly if not even higher standards for professional and ethical behavior. It is through this role modeling that all of us, faculty and
students, have benefited from working with John across his 37 year career at IUPUI.

Jane Williams, PhD
Associate Professor and Acting Chair
Department of Psychology
Purdue School of Science, IUPUI
Marjorie Kurt, MSN, RN  
Clinical Assistant Professor Emerita  
Department of Adult Health  
School of Nursing  

Marjorie Kurt received her initial appointment to Indiana University School of Nursing in 1988 as a full-time lecturer and since 1995 has served in the rank of Clinical Assistant Professor. She has sustained excellence in her practice as a medical surgical nurse, and holds certifications Renal I & II and Organ Transplant. Her scholarship in teaching is evidenced through her professional presentations regionally, nationally, and internationally. Most notably she has built a relationship with the Russian Nurses Association and she often travels to Russia to teach. Marjorie has also served as a reviewer for many nursing textbooks.

Her service to the school and the campus has been excellent. Marjorie served has served as a member of the School of Nursing By-Laws committee and the BSN APG committee to name a few. Marjorie has been tireless as an organizer, planner, and implementer of multiple functions such as the Culbertson Retreats and the 90th anniversary celebration for the school. In addition she has served as a class advisor for multiple years because her students hold her in high regard. She also served as a judge for the Top 100 Student’s Award.

Marjorie’s service to the profession has been in leadership roles with Sigma Theta Tau, Alpha Chapter. She served as Vice-President of that organization and still sits on the board. She has also served as Chair of the By-Laws Committee in Sigma Theta Tau International.

Her community service is evidenced with presentations to elementary and high school children regarding health care issues. She has served as a Red Cross Instructor, and an RN consultant at Ben Davis High School. She has received multiple awards for her work. She received an outstanding service award from the Indiana
University Alumni Association, the Spirit Award at St. Francis, Outstanding Teacher Award from BSN students, and the TERA award for Teaching from Indiana University. A notable award was the first Marjorie Kurt Service award given to her from the Alpha Chapter of Sigma Theta Tau.

Marjorie will be greatly missed by the IU School of Nursing.

Janice Buelow, PhD, RN
Chair Department of Adult Health
School of Nursing
**Bruce Matis, DDS, MSD**  
Professor Emeritus of Operative Dentistry  
School of Dentistry

Dr. Bruce Matis came to the School of Dentistry in 1993 after a 22-year career as a dentist in the United States Air Force. His friendly, kind demeanor immediately endeared him to dental students, graduate residents, staff, and his dental colleagues.

His many accomplishments attracted international recognition and acclaim to the university. His clinical studies made him a world renowned expert in tooth whitening. As director of the Clinical Research Facility, he brought visiting scholars from Finland, Korea and China to conduct research at IU. He has been invited to lecture in 36 countries. He was presented with a key to the Wuhan Stomatological College, Wuhan, China for his role as Principal Investigator of a joint research study by Wuhan University and Indiana University School of Dentistry. The American Dental Association awarded him a Certificate of Recognition for promoting international relations.

Dr. Matis served the university as a member of the IUPUI Faculty Council and the IUPUI Institutional Review Board. He was a chairman of Dental Research Day and president of the Indiana Section of the American Association of Dental Research. During his tenure as president of the Indiana Chapter of the National Dental Honor Society, Omicron Kappa Upsilon, the Indiana Chapter was awarded the National Chapter of the Year Award. He has worked tirelessly as an Associate Editor of the internationally acclaimed dental journal, *Operative Dentistry*.

In addition to his contributions to the university, Dr. Matis has devoted himself to community service being particularly active in the Crossroads Council of the Boy Scouts of America. In recognition of his community service, he was chosen by the United States Olympic Committee to be a member of the Olympic Torch Relay Team for the 1996 summer Olympic Games in Atlanta, Georgia.
Words are inadequate to describe the impact that Bruce Matis has had on dental education at IU. We express congratulations at the conclusion of a truly stellar career and sincere appreciation for his commitment and devotion to the Indiana University School of Dentistry.

N. Blaine Cook, DDS, MSD
Clinical Associate Professor and
   Director of Graduate Operative Dentistry
School of Dentistry
Douglas McKeag, MD, MS
Chairman, Department of Family Medicine
OneAmerica Professor of Preventative Health Medicine
Director, IU Center for Sports Medicine
Director, Primary Care Sports Medicine Fellowship
Associate Professor of Clinical Family Medicine
School of Medicine

Director, Primary Care Sports Medicine

Douglas B. McKeag, M.D., M.S. became the third Department Chair for the Department of Family Medicine in 1999. Under Dr. McKeag’s tenure, the Department of Family Medicine expanded significantly – recruiting a cadre of new junior faculty members, opening new clinical practice sites, and developing new “niche” areas of strength. Upon his retirement, the DFM had 31 faculty and 18 staff members, with endowed professorships totaling approximately $2.6 million to support four faculty members (One America Professorship $1,071,742; Dr. George W Copeland fund $804,084; Otis R. Bowen Professorship $434,080; Lester D. Bibler Scholar $338,156). Other accomplishments under Dr. McKeag’s tenure include the Department creating two new fellowships – one for sports medicine and another for OB, and becoming leaders of the school’s global health initiative with our creation of electives in Honduras.

Andy Walker, MBA
Director of Finance
Department of Family Medicine
School of Medicine
Janet Meyer
Lecturer/Advisor
Purdue School of Engineering and Technology, IUPUI

Janet Meyer retired in December, 2011, after nearly thirteen years of service in the School of Engineering and Technology, first in the Freshman Engineering Program and later in the New Student Academic Advising Center. During this period she served as mentor, instructor, and advisor for hundreds of freshman engineering students. She also made contributions to the School in the areas of assessment and degree audit coding.

Janet developed the first-year seminar course for freshman engineering students and later extended the curriculum to the first-year seminar course for technology students. Over the years, in addition to serving as the school coordinator of the first-year seminar courses, Janet taught more than sixty sections of these courses. She coordinated several themed learning communities in engineering and implemented service learning as a theme. She also taught the engineering ethics course for senior students.

Because of her contributions to first-year student education, Janet was invited to become a University College adjunct faculty member in 2008. She also served on the Personal Development Plan Electronic Portfolio (ePDP) Development Committee. She presented several papers at the American Society for Engineering Education annual conference and won a best paper award in 2007. She also was a presenter at the National Learning Communities Conference.

Janet was one of only two women graduates in engineering at Purdue University in 1968 and was the first female intern at U.S. Steel in Chicago. She thus was an effective advocate for women engineering students. She served as faculty advisor for the Student Chapter of the Society of Women Engineers for eleven years.

Despite Janet’s accomplishments in her faculty and administrative roles, she considers her most gratifying work to have been in advising and supporting students who needed additional
encouragement. Her commitment to students has been a model for us all.

Nancy Lamm
New Student Academic Advising Center
Purdue School of Engineering and Technology, IUPUI
Susan Moore, RN, PhD, FNP-BC, GNP-BC  
Emeritus Clinical Assistant Professor  
Department of Family Health Nursing  
School of Nursing  

Dr. Susan Moore has been an outstanding nurse educator and provided course leadership for the graduate courses in the MSN Adult Nurse Practitioner curriculum. Dr. Moore received her initial appointment to Indiana University School of Nursing in 1981 and earned her PhD from Indiana University School of Nursing in 1989. Dr. Moore has served the School of Nursing in many capacities and is retiring from our community as the coordinator for the Adult Nurse Practitioner Program.

She has sustained excellence in her practice as a nurse practitioner and holds certification as a Family Nurse Practitioner, Gerontological Nurse Practitioner, as well as ACLS. She was an active participant in the Fairbanks Simulation Center. Her scholarship in teaching is evidenced by her popularity as a presenter and author regarding practitioner issues in advanced nursing practice as evidenced in her curriculum vitae. Her service to the school and the campus has been excellent. Dr. Moore has served as a member of the School of Nursing on multiple committees and has represented the School of Nursing to such groups as Indianapolis School Based Initiative, United Way, ISNA Council on Advance Practice, and the Governor's Task Force for Adult Protective Services.

The outstanding leadership Dr. Moore has contributed to the School of Nursing is very considerable. In 1993-2003, she was the Founding Co-Director/Director of the Shalom Health Care Center and in 1996-1999 was consultant to the American Indian Center of Indiana. She received the 2000 Distinguished Public Service Award from the Indiana University School of Nursing Alumnae Association and was President and Vice-President, Alpha Chapter, Sigma Theta Tau from 2004-2008. Just this year, Dr. Moore won the 2012 Indianapolis Star Tribute Award – A Salute to Nursing! This honor recognizes nurses and nurse educators from around the state who provide selfless service and tireless dedication to the
community. Dr. Moore is most deserving of this honor. Ghandi stated, “The best way to find yourself is to lose yourself in the service of others.” Dr. Moore is a service leader and has contributed to many student lives as well as those of the underserved.

We wish Dr. Moore the very best in her next chapter and thank her for her contributions to the Indiana University School of Nursing.

Deborah Cullen, PhD
Professor and Interim Chair
Family Health Department
School of Nursing
Sandra Morzorati, PhD
Associate Research Professor of Neurobiology
Department of Psychiatry
School of Medicine
With adjunct appointments in Departments of Psychology & Occupational Health, IUPUI

After several years as an Instructor and Research Consultant in the School of Nursing, in 1985, Sandi received an appointment as Assistant Scientist of Neurobiology in the Department of Psychiatry; her research labs were located in the Institute of Psychiatric Research. Sandi was responsible for setting-up two very novel neuro-electrophysiology laboratories in the Institute. Sandi took on the very difficult task of conducting in vivo electrophysiological studies on neurons that are functioning within their normal environment. She was a leading expert on using this technique; Sandi published several seminal articles with this procedure and successful obtained NIH funding for 10 years to support her research. The second procedure that Sandi pioneered and set up on her own was measuring EEG power spectrum in laboratory rodents to conduct studies on alcohol addiction, sleep abnormalities, anxiety and Schizophrenia.

Sandi was an independent investigator and had her own labs and technical support. However, Sandi was always open to collaborating with other investigators to address important scientific questions. She readily collaborated with other investigators across departments in the School of Medicine, and with investigators in the Purdue School of Science and School of Nursing. Her collaboration to examine heritability of event-related potentials and EEG power spectrum in human studies had a significant impact on the field.

Although not required by her position, Sandi readily gave lectures in different courses, e.g., Neurobiology course for Psychiatry Residents, Principles of Neurophysiology to graduate students, and different neuroscience lectures in the School of Nursing and Department of Occupational Therapy.
In summary, Dr. Morzorati was a unique member of the department. She was the only individual on campus with the skills to conduct in vivo measurements on neuronal activity in distinct brain sites and to also be able to conduct EEG measurements in both animals and humans. Her unique electrophysiological skills were unmatched on this campus or at any other institution in the US. She will leave a big hole in the department, and will be missed by faculty and staff.

William McBride, PhD
Professor Neurology
Department of Psychiatry
Institute of Psychiatric Research Medicine
School of Medicine

Alan Schmetzer
Professor Emeritus and Interim Chair
Department of Psychiatry
School of Medicine
E. Theodore Mullen, Jr.
Professor Emeritus of Religious Studies
School of Liberal Arts
Director Emeritus of the IUPUI Honors Program
Associate Dean Emeritus, University College

Ted Mullen arrived at IUPUI in 1978 fresh out of graduate school at Harvard, where he earned a Ph.D. in Near Eastern Languages and Civilizations. Over the next three decades, he established himself internationally as a scholar of the Hebrew Bible, thus helping to pioneer our high research standards in the Department of Religious Studies. His first book, The Divine Council in Canaanite and Early Hebrew Literature (1980), appeared to critical acclaim, as did two subsequent books, Narrative History and Ethnic Boundaries (1993) and Ethnic Myths and Pentateuchal Foundations (1997), in which he applied sociological theories of ethnicity to the study of Israelite identity in the Pentateuch. Retirement has not diminished his scholarly productivity. He is presently putting the finishing touches on a fourth volume, Creating the Prophets: The Hebrew Prophetic Books and Early Jewish Ethnicity, which will form a trilogy with his second and third books.

Yet for all of his hard-hitting contributions to the field, Ted Mullen is no cloistered textuary. Indeed, I dare say he has contributed more to the educational mission and governance of IUPUI than most mortals could hope to do in two or (even three) lifetimes. Throughout his 33½ years on the faculty, Professor Mullen was known as a rigorous and demanding teacher and a trusted mentor for many of IUPUI’s most gifted undergraduates. From 1998 until 2009, he directed the IUPUI Honors Program and served as associate dean of University College, of which he was a charter faculty member. Scott Evenbeck, former dean of University College, has credited Professor Mullen for his pivotal role in building the campus-wide Honors Program, which began on a shoestring in 1998, into the successful Honors College it is today. Professor Mullen also distinguished himself as the sort of
uncommonly good citizen who never said no when asked to serve on another committee or selection panel. In my own role as department chair (a position Professor Mullen occupied for two terms), I appreciated not only his extraordinary voluntarism but also his dry wit and twinkling eye, which never failed to remind me of what a privilege it is to have colleagues who take such delight in the life of the mind.

Peter Thuesen, PhD
Professor of Religious Studies and Department Chair
School of Liberal Arts
James Murphy, PhD  
Professor and Area Head of Psychobiology  
Department of Psychology  
Associate Dean of Research and Graduate Education  
Purdue School of Science, IUPUI

Jim Murphy received his Ph.D. in Experimental Psychology from Bowling Green State University. After 3 years at the University of Virginia, in 1979 he was recruited to the Institute of Psychiatric Research as a Research Associate in Department of Psychiatry. What Jim thought was going to be a typical 3-year research associate appointment turned into a lifelong career in research, teaching and service here at IUPUI.

Jim played a key role in the groundbreaking animal model research on the genetic and neurochemical bases of alcohol drinking and alcoholism. Jim helped establish the Indiana alcohol-preferring and non-preferring selectively bred rat lines as a powerful animal model of voluntary alcohol drinking, and extended that approach to additional genetic models. His work provided insight into the behavioral and brain processes linked to alcohol drinking and abuse in these genetic animal models, and he helped develop new approaches such as a rodent model of alcohol binge-drinking. Jim developed techniques for the direct study of the rewarding actions of alcohol in discrete brain regions, and helped identify neuronal pathways involved in regulating alcohol drinking behavior. His contributions to basic research with animal models of alcoholism are now widely known.

Jim taught courses on a part-time basis for the Psychology Department until finally in 1989 he was convinced to accept a full-time appointment as Associate Professor in Psychology. This was a momentous transition for the department, because Jim became the founding member and leader of the Psychobiology of Addictions graduate program. He skillfully navigated the process of founding the program in 1994 and, under his stewardship, it grew to reach its vibrant success, currently with 7 faculty and 15 graduate students. His legacy is that he brought the discipline of
behavioral neuroscience to the School of Science. In addition, as
Associate Dean for Research, Jim provided key leadership in
making the new Science and Engineering Laboratory Building a
reality.

Charles Goodlet, PhD
Professor
Department of Psychology
Purdue School of Science, IUPUI
Paul Newcomb, PhD
Associate Professor
School of Social Work, South Bend

When Dr. Newcomb joined the Masters in Social Work program, Indiana University South Bend, in 1998 it was a small and struggling program, with only two faculty and 40 students. Under his watch, the program tripled the number of students, increased the number of faculty, and strengthened its reputation in the community. Among his contributions was to establish particularly high standards for field instruction and field liaison activities with community agencies.

Prior to joining the Indiana University School of Social Work, Dr. Newcomb was a full professor at California State University of Los Angeles, associate professor at University of Southern Indiana and Associate Professor at University of Southern Florida. He earned his Master of Social Work at State University of New York at Buffalo and his doctoral degree in Social Work at Florida State University.

Dr. Paul Newcomb’s career at the Indiana University School of Social Work was carried out at the South Bend campus. He had a major impact on the Masters in Social Work program at IUSB through his teaching and service over the years. Dr. Newcomb joined the faculty in July of 1998 and served as program director from 1998 to 2007.

Dr. Newcomb’s scholarly work has focused on HIV/AIDS, chemical dependency, and social justice issues. His publications and presentations have appeared in important social work journals and at conferences of significant professional societies.

Paul Newcomb has also left a lasting legacy through his teaching. Dr. Newcomb has taught research, policy, addictions, and introductory social work classes. While he recognized that research is not always the favorite class for social work students, he assisted
students in developing an understanding both of the fundamentals of research and also the importance of these concepts and skills for competent social work practice. His former students, the graduating class of 2012, came forward as a group and requested that Dr. Paul Newcomb serve as faculty marshal for their Commencement this spring, despite the fact that Dr. Newcomb retired last summer. This speaks to the lasting impact and legacy of Paul’s teaching in the Masters in Social Work program on the South Bend campus.

Dr. Newcomb has also been recognized for his service. He has received special recognition for his service to the community. In 2002 He was given the Outstanding Volunteer of the Year Award by the American Red Cross. In 2001 he was granted the Sister Ethne Kennedy Volunteer of the Year Award by AIDS Ministries/AIDS Assist. Dr. Newcomb served the university through his contributions to campus and IU School of Social Work Committees. Dr. Newcomb’s professional service has included membership on editorial boards of three prestigious social work journals: *Families in Society, Advances in Social Work*, and *Journal of Social Work Research*.

Dr. Newcomb is missed, and the program continues to build on work that he carried out to strengthen the teaching, service, and scholarly missions of the Masters in Social Work Program, South Bend, Indiana University School of Social Work.

Carol Rippey Massat, PhD, ACSW  
Professor and Director  
Masters in Social Work Program, South Bend  
School of Social Work
It’s with mixed emotions that I write this tribute. The fact is, although we feel happy for Ursula regarding her splendid career, we deeply miss having her on our full-time faculty. She is a remarkable friend and colleague, not only a bright and pleasant presence but a conspicuously dedicated teacher. What’s more, she is an irreplaceable scholar with broad and fascinating interests—interests that include semiotics, existentialism, utopianism, renaissance philosophy, American philosophy, philosophy of art, philosophy and tragedy, and philosophy of literature. Also, she is well versed in subjects related to these areas, including Greek tragedy, utopian literature, and art history. Scholars of such breadth are rare gems; and a precious gem indeed is Ursula Peterson.

Let me add a few words about Ursula’s career. She has held appointments in the Warsaw University Institute of Philosophy, the Peirce Edition Project, and the IU Center for Language and Semiotic Studies. She has been a member of the IUPUI philosophy department since 1990. She is the winner of an IU Trustees Teaching Award and the Award of the Rector of Warsaw University for Scholarly Achievement and Service.

I said that we will deeply miss Ursula. Let me add two further points. First, it is not just the faculty who will miss Ursula, but also our students who will do so. Recently I had a chat with a student who, in expressing her admiration for Ursula, exclaimed that Ursula is “scarily smart in every subject I’ve ever discussed with her!” The student meant, of course, not that Ursula is a scary person, but that Ursula’s expertise is amazingly broad and deep. Indeed, scary is the last thing Ursula is, especially in her dealings with students. Among our students she is widely known as one of the most available, caring, helpful, and encouraging professors on the liberal arts faculty.
Second, all is not sadness, for Ursula plans to continue her research and (to the joy of our department!) to teach for us part time. Just as we are deeply grateful for her past achievements, we are deeply pleased and honored to know that her friendship and her connection with our institution will continue for many years.

John Tilley, PhD
Professor and Chair
Department of Philosophy
School of Liberal Arts
Jean Preer, JD, PhD
Professor
School of Library and information Science-Indianapolis

Professor Preer is within the field of library science a nationally known scholar, teacher and good citizen. Holding both the Ph.D. (history) and the law degree (J.D.), professor Preer is the epitome of perfect academic integration; bringing both her scholarship and a passion for life-long commitment to professional service and education into the classroom. Her research and service interests have also reflected the substance of her teaching.

Professor Preer is tireless in her commitment to her students and to all students of library science. She sits on the board of Association for Library and Information Science Education (ALISE) and believes strongly as the saying goes that one should put into practice what one preaches. In 2006 that organization—the primary organization in our field dedicated to library student education—awarded Jean the ALISE Award for Teaching Excellence. She has received teaching recognitions from other entities and organizations over the years including the year prior, the IU Trustees Teaching Award and her course evaluations are consistently among the highest in the school. Professor Preer, a 2009 Fulbright scholar is a leader in the area student and professional ethics, in fact she helped craft the ALISE Ethical Standards statement (adopted 2010).

An impeccable scholar, Jean was given in 2007 the Justin Winsor Prize for Excellence in Library History Research for her essay on librarian activism and the 1952 presidential election. Her recent book on Library Ethics was given the Greenwood Publishing group Prized for Best Book in Library Literature in 2009 (she plans to continue her work in that area upon retirement as a second edition of the ethics book is planned for 2014).

Jean has also distinguished herself in the area of library philanthropy, having designed and taught a Library Philanthropy
class here at IUPU for many years—the course serves as an anchor for MLS students in the dual MLS/MA in Philanthropic Studies (IU School of Liberal Arts - Indianapolis). The program offerings in nonprofit library philanthropy here at IUPUI are unique but recognized among library educators and much is owed to Dr. Preer for that recognition. Practicing what she preaches as the saying goes Jean put her academic and professional expertise to practice while on sabbatical in fall 2012 as a visiting scholar at the Indianapolis-Marion County Public Library Foundation.

In short, Jean has dedicated her entire intellectual capacity and a bit of her heart in furthering scholarship, education and professional practice in the field of library science. Please join the faculty, staff and students of the School of Library and Information Science in wishing her all the best in her retirement.

Tomas Lipinski, JD, LLM, PhD
Executive Associate Dean and Professor
School of Library and Information Science-Indianapolis
José Rosario’s distinguished career in higher education spans 38 years. He joined Indiana University in 1988 as an associate professor of education at IU Northwest after holding research and faculty positions at Inter American University of Puerto Rico, State University of New York, High/Scope Educational Research Foundation, Florida Institute of Education at the University of North Florida, and the Chicago Teachers Center at Northeastern Illinois University. He transferred to IUPUI in 1998 as a professor. His career is marked by an impressive list of accomplishments. Jose’s large body of research and publications, focused on curriculum, schooling, social justice issues, and public policy, has made a significant contribution in the education field. His extensive advocacy and groundbreaking work has positively impacted the Latino community.

José has provided incredible leadership in the School of Education, serving as Director of the Center for Urban Multicultural Education, Faculty Chair, and a core member of the urban education graduate programs. He has been highly engaged in community work, serving on the Mayor’s Charter Schools Board. He was the founder and director of the El Puente Project, a program developed in collaboration with the Hispanic Education Center in Marion County. The program helped Hispanic youngsters stay in school, graduate from high school, and pursue post-secondary education. Jose was also a founding Board Member of The Latino/a Youth Collective of Indiana, Inc., which provides resources and opportunities for youth to engage in personal and community development through critical pedagogy, grassroots organizing, and collective action.

José received numerous research awards, grants and contracts from various government and private sources to conduct basic and applied research in schools and community-based organizations,
including evaluations of homelessness prevention projects supported by the Coalition for Homelessness Intervention and Prevention. He has been recognized with numerous awards and honors. These include the 2002 Dr. Joseph T. Taylor Award for Distinguished Contributions; a Research Fellowship at the University of Notre Dame Institute for Latino Studies in 2006-2007; the 2008 Hispanic American Service Award for Community leadership; and recognition by City Council of City of Indianapolis for the El Puente Project and service to the city in 2008.

José will be remembered as an incredibly smart, thoughtful, soft spoken and modest scholar and leader who led by example and was a tireless advocate. We are grateful for his many contributions to our School of Education and wish him all the best in retirement.

Pat Rogan
Executive Associate Dean
School of Education, IUPUI
Donald Schmitt, DDS
Clinical Assistant Professor of Prosthodontics
School of Dentistry

Dr. Schmitt began his academic career at Indiana University School of Dentistry in 1974, and appointed as an Assistant Professor in 1978. In the 38 years since he first arrived at IUSD, he has been a strong, passionate teacher and supporter of prosthodontics.

He has been a long serving course or module director for the Occlusion and Gnathology classes for the pre-doctoral dental and post-doctoral prosthodontic students. He has inspired many of our students to critically assess the occlusal relationships of their patients.

Dr. Schmitt has been a fan and early adapter of new technology, (especially Apple technology), and has been a strong proponent for the use of computers in the curriculum. Dr. Schmitt was instructing and mentoring other faculty in the use of computer technology for education and clinical dentistry as early as 1989. He presented this information to prominent national professional societies from the early 1990’s, into the early 2000’s.

Dr. Schmitt is a respected mentor and teacher. He has inspired our graduate students to be passionate about the discipline, and to critically evaluate their treatments.

Dr. Schmitt has been an active citizen of the School and Department. We have benefitted from his dedication and efforts during his career as an educator.

David Brown, DDS
Professor and Chair
Restorative Dentistry
School of Dentistry
Aslam Siddiqui, MD  
Professor Emeritus  
Department of Radiology & Imaging Sciences  
School of Medicine

Dr. Siddiqui originally joined the then Indiana University School of Medicine, Department of Radiology as Assistant Professor in 1976 following completion of a fellowship in Nuclear Medicine at the University of Chicago/Michael Reese Hospital in Chicago.

He started the first pediatric Nuclear Medicine clinical facility at Riley Hospital in mid 1980s and has continued to serve as the Department’s expert in pediatric Nuclear Medicine since that time.

He was promoted to Associate professor in 1980 and to full professorship in 1984.

Dr. Siddiqui has been involved in a multitude of educational programs in the Department and chaired the Department of Radiology Medical Education Committee from 1992-2003. He has also served the Department as Director of the Radiology Clerkship for senior medical students from 1992-2003 and under his leadership this Clerkship was twice voted by the students as the best fourth year clerkship in the Medical School. Following this activity, he became Director of the Department of Radiology Fellowship programs from 2004-2008 as well as Director of the ACGME-approved graduate training program in Nuclear Medicine from 2002-2010.

He has received a numerous teaching awards from Radiology residents and Nuclear Medicine Technology students and is always considered one of the best teachers/educators in the Department of Radiology and Imaging Sciences.

In addition to his dedication to the field of Nuclear Medicine, especially pediatric Nuclear Medicine, he has been involved in
the publication of over 90 articles in peer-reviewed journals and one single-author text book, *Nuclear Imaging in Pediatrics*.

When Dr. Siddiqui is not busy with his career, he spends time with one of his principal avocations – playing contract bridge – he holds the American Contract Bridge League’s designation of Bronze Life Master.

For all of our faculty and the students, and residents that we teach, I would like to thank Dr. Siddiqui for his tireless dedication and efforts during his tenure here at Indiana University School of Medicine.

James Fletcher, MD, FACR
Professor of Radiology and Imaging Sciences
Director, IU (IIBIS) Cancer Imaging Center
Director, Nuclear Medicine, Positron Emission Tomography/Computed Tomography
Department of Radiology and Imaging Sciences
School of Medicine
Rebecca Sloan, RN, PhD  
Emeritus Associate Professor  
Department of Family Health Nursing  
School of Nursing  

Dr. Sloan has been an outstanding contributor to the Indiana University School of Nursing providing graduate student mentorship and as a role-model to many. She has served in several capacities and is retiring from our community as a leader in graduate education and qualitative research.

Dr. Sloan received her ASN, BSN, and MSN from Indiana University School of Nursing and was initially appointed to Indiana University School of Nursing at Indianapolis in 1994. She has practiced as an Adult Nurse Practitioner and continues to work with adult patients in several care settings. Her scholarship has been primarily qualitative and she has received awards and published in many prestigious journals.

Rebecca has served as member or chair for 17 dissertation committees at Indiana University and in several roles on many international dissertation committees. Notably, she has been research study advisor to 84 Master of Nursing Science students. She is well known for her 63 research articles as primary or co-author and many of these articles are related to dialysis patients. Moreover, she received research support from multiple external agencies for her work related to dialysis and the issues that dialysis patients face daily. As an active researcher, she presented 99 abstracts and papers.

Her service to the school and the campus has been significant. Dr. Sloan has served as a member of the School of Nursing on multiple committees and has represented the School of Nursing to such groups as Kidney Disease Program at University of Louisville, Indiana State Department of Health Office of Women's Health, Kindred Hospital- Indianapolis, and the National Kidney Foundation of Indiana, Inc.
Dr. Sloan instilled a sense of responsibility and respect for research in her many students. Mother Teresa said, “Do not wait for leaders; do it alone, person to person.” Significantly, this describes Dr. Rebecca Sloan as an important mentor to graduate students who will continue to foster positive changes in the world. We wish Dr. Sloan the very best in her next chapter and thank her for her contributions to the Indiana University School of Nursing.

Deborah Cullen, PhD
Professor and Interim Chair
Family Health Department
School of Nursing
**Rex Stith, PhD**  
Assistant Dean and Center Director  
Emeritus Professor of Physiology and Biophysics  
IU School of Medicine-Evansville  

During his time as Assistant Dean and Director of IUSM-E, Rex Stith dedicated himself to creating and maintaining a top-tier medical education program. He worked tirelessly to educate, mentor and support the students, IUSM-E faculty, and physicians in the surrounding region. Under his leadership, IUSM-E became a campus that consistently produced some of the best medical education scores in the state.

During his 19 year tenure at IUSM-E, Dr. Stith directed the education of more than 275 new physicians during their first two years of medical school. He also expanded his support of medical education beyond IUSM-E, serving as Director of Continuing Education for Medical Staff at Deaconess Hospital in Evansville and on Deaconess’ Residency Oversight committee. He served on the Board of Directors of several medical associations in the region and on the Mayor’s Task Force on Biotechnology.

For much of his career, Dry Stith maintained an active, successful research program, receiving multiple grant awards from the National Institutes of Health and publishing 41 peer reviewed manuscripts in the areas of endocrinology, metabolism, and cardiovascular health. Believing that research activity is essential to a quality base of full-time faculty and a top-notch medical program, he tirelessly supported the research activities of his faculty. During his time at IUSM-E, the faculty received research grants from many philanthropic foundations, biomedical companies, and from the National Institutes of Health, totaling well over 2 million dollars.

Furthermore, many unique programs such as the B/MD program with the University of Southern Indiana, the Summer Undergraduate Research Experience program at IUSM-E, and the school’s continuing research partnership with Mead Johnson Nutrition have him to thank for their success. Over 55 young
professionals, most from southwest Indiana, received research training in IUSM-E laboratories due to the support of Dr. Stith.

While at IUSM-E Rex demonstrated a deep sense of community and faith, and we would be remiss if we did not mention what a good hearted person Rex is. We thank Rex for his many years of service to medical education, and to research, and to his community of Evansville, but most especially we thank Rex for the guidance he gave to us while at IUSM-E.

Rex, we will miss you. We wish you and Carol many years of health and happiness together.

Carla Aldrich, PhD
Tracy Anthony, PhD
G.S. Seetharamaiah, PhD
Cezary Wojcik, MD, PhD, DSc
IUSM-Evansville
Melinda Swenson, RN, PhD, FAANP, ANEF
Emeritus Professor
Department of Family Health Nursing
School of Nursing

Dr. Melinda Swenson received her initial appointment to Indiana University School of Nursing in 1980 as a lecturer, and since 2003 has served in the rank of Professor. She has sustained excellence in her practice as a Family Nurse Practitioner and continues to serve as a Family Nurse Practitioner at the Indiana University Health Center in Bloomington. She was inducted as a Fellow of the American Academy of Nurse Practitioners in 2004 and was awarded as a National League of Nursing Fellow in the Academy for Excellence in Nursing Education in 2009.

She developed the innovative Narrative Centered Curriculum used in the FNP Major at the IU School of Nursing since 1995. She has published and presented this unique curriculum nationally and internationally, highlighting modifications of Patient-Based Learning and other narrative approaches to teaching and learning. Her research interests include appreciative inquiry and other integrative strategies for curriculum planning and evaluation, the experience of living at risk for Huntington Disease, and nurse practitioner curricular concerns, focusing especially on reflective teaching and practice. She conducts and supervises research using a variety of qualitative methodologies, especially hermeneutics and phenomenology.

Dr. Swenson’s service to the school and the campus has been excellent. She served as coordinator for the Family Nurse Practitioner Program from 1995 to present. Her professional service includes serving as a reviewer for 12 different publications, external reviewer of dossiers for promotion and tenure at 10 major universities, and was a major force in the development of the Family Nurse Practitioner Major. She was a leader in the Master’s of Nursing Science and a force in establishing the Doctorate of Nursing Practice degree.
Dr. Swenson has published 29 teaching articles, 13 research and theory articles, and 21 conference proceedings and service articles. She participated in 13 funded internal and external grants and presented at 74 conferences. She also chaired one DNP and eight PhD doctoral committees and was a member on 10 others.

Dr. Swenson has influenced the lives of hundreds of students and thousands of patients. Albert Schweitzer said, “Example is not the main thing in influencing others. It is the only thing.” Dr. Swenson’s example has been an influence on others and on the School of Nursing and is not a small thing – it was and will continue to be a major force.

We wish Dr. Swenson the very best in her next chapter and thank her for her energy and thoughtful influences and role-modeling.

Deborah Cullen, PhD
Professor and Interim Chair
Family Health Department
School of Nursing
Kathryn Wilson, PhD
Assistant Vice Chancellor for Research Emeritus
Associate Professor and Dean Emeritus
Purdue School of Science, IUPUI

Kathryn Wilson joined IUPUI as Assistant Professor of Biology in 1976, after earning her PhD from Indiana University. For the next fifteen years, she carried out research in her specialty of plant cell and developmental biology and also served a term as Chairman of the Department. From 1992-2004, she was Associate Dean for Research and Graduate Studies in the School of Science, where her responsibilities included the promotion of scholarly research, support of activities involving graduate programs, and supervision of grants and contracts. Kathryn led the design and implementation of the SoS Undergraduate Research Opportunities Program (UROP) and played a key role in the development and funding of the Diversity Scholars Research Program, which was decisive in establishing a campus-wide diversification of undergraduate research students.

In 2004, Kathryn moved to campus level administration as Founder and Director of the Center for Research and Learning (CRL). She planned and coordinated the 2004 National Conference for Undergraduate Research (NCUR), which brought 2400 undergraduate research students and their mentors to the IUPUI campus. She served on the NCUR Board and was a founding member of the National Organization for the Directors of Undergraduate Research (NDUR). As Director of the CRL and, since 2008, as the Assistant Vice Chancellor for Research, Kathryn developed and directed campus-wide undergraduate research programs, including UROP and the Ronald E. McNair Program. Notably, she secured over two million dollars in external grant support for these endeavors.

Kathryn Wilson’s diverse and rich career at IUPUI has given undergraduate students entry into a learning context that has made IUPUI a nationally recognized leader in undergraduate research,
and set many of these students on the path to professional and scholarly careers they otherwise might never have considered. Well done, Kathryn!

David Stocum, PhD
Professor of Biology
Director, Center for Developmental and Regenerative Biology
Dean Emeritus, Purdue School of Science, IUPUI
Thomas Wolfe, MD  
Assistant Professor of Anesthesia  
Department of Anesthesia  
School of Medicine

Thomas M. Wolfe, M.D., tenured Assistant Professor of Anesthesia, Indiana University School of Medicine retired from the faculty after 34 years’ service to the University in March 2012. It is a privilege for me to provide this brief biographic tribute to my long-term colleague and friend.

Dr. Wolfe is a native of Indiana. He completed his undergraduate education at Purdue University and medical education at IU School of Medicine. Following graduation form medical school in 1974, Dr. Wolfe completed an internship, a residency in anesthesiology, and a one-year fellowship in pediatric anesthesiology, at IUSOM. Following completion of his fellowship in June 1978, we were fortunate to recruit Dr. Wolfe and he joined IU anesthesia faculty and the Section of Pediatric Anesthesia at Riley Hospital for Children as an attending pediatric anesthesiologist.

The section of Pediatric Anesthesia at Riley Hospital was established in 1973. Dr. Wolfe has been an integral part of Section of Pediatric Anesthesia for the past 34 years of its 39-year history. When Dr. Wolfe joined us in 1978 pediatric anesthesia at Riley was in the stage of rapid growth and development and Dr. Wolfe with his boundless energy and enthusiasm and desire to contribute was a great asset in facilitating the developmental process. During his long tenure at Riley Dr. Wolfe has made sustained and significant contributions to every aspect of pediatric anesthesia related activity at Riley Hospital for Children namely patient care, education, administration and scholarly activities.

Dr. Wolfe is well recognized and respected for his clinical expertise and has provided excellent patient care to thousands of neonates, infants and children at Riley Hospital for children. Dr. Wolfe enjoys a high reputation as an educator and has helped train a generation of anesthesiologists now administering anesthesia to
patients not only in Indiana but also all across the United States. The residents consistently rank him as one of the best teachers. In addition to educating residents and fellows he is involved in clinical and didactic education of medical students and trainees rotating on our service from other departments and other institutions. Dr. Wolfe’s major areas of interest include operating room efficiency, acid-base balance, pediatric trauma, craniofacial anomalies, burns and difficult airway management. He has lectured on all aspects of pediatric anesthesia and is frequently invited to speak at continuing education course at the state and national level. He has served as a question writer and oral examiner for the American board of Anesthesiology. Dr. Wolfe’s additional educational efforts include his contributions to anesthesia literature; he has authored or coauthored many abstracts, journal articles and book chapters. Of special note is the great popularity of the 100 page-long “Riley Anesthesia Procedure Manual” amongst anesthesia residents. This manual was authored and compiled solely by Dr. Wolfe some twenty-five years ago and he has diligently updated it at frequent intervals.

Dr. Wolfe has a genuine interest in foreign cultures and health care systems. Over the years we have had many foreign anesthesiologists spending time in our division to acquire pediatric anesthesia knowledge and skills. Dr. Wolfe always made a special effort to make them feel comfortable in our environment, mentor them and help familiarize them with American culture.

At the administrative level Dr. Wolfe has served as course director of medical students’ education in anesthesia and as director of the CA-1 anesthesia residents’ course. He has served on numerous departmental committees including the executive and business committees, hospital and school of medicine committees. He served two three-year terms on the board of the IU Specialty Care Board.

The Section of Pediatric anesthesia is very thankful to Dr. Wolfe for his contributions to pediatric anesthesia. We are happy to know
that although he is retiring from Indiana University he plans to continue to be involved in patient care and teaching at Riley Hospital.

Gopal Krishna, MD
Professor Emeritus
Department of Anesthesia
School of Medicine
